

Date:

Dear Parent/Guardian/Student.

As required by Arizona Administrative code, a developmental/academic screening has been conducted on your child. Areas of observation included: vision and hearing status, communication skills, academic/cognitive progress, motor abilities, social/behavioral conduct, and adaptive development.

Your child's teacher of record, has indicated the following concern(s):

- Vision Status
- Hearing Status
- Communication Skills
- Academic/Cognitive Progress
- Motor Abilities
- Social/Behavioral Conduct
- Adaptive Development
- Other

Please know that this initial screening is mandated by Arizona Administrative Code and is meant to ensure that student concerns are not overlooked within the first 45 days in a new school. Screening is also required when a parent expresses concerns about his or her child's academic or developmental progress. It is NOT a diagnosis of any problem, but rather a screening.

Based on your child's screening results, I have taken the following action:

- I have referred the student to our child study team to implement strategies to help your child.
- I have requested that the teacher conduct progress monitoring throughout the year.

In addition,

- I am requesting we meet to discuss screening results. Please call me at \_\_\_\_\_.
- Other:

Feel free to contact me, or your child's teacher, if you have questions or additional concerns. We will follow your student's progress and contact you if there appears to be significant educational difficulty.

Sincerely,

Amber Stock, M.A. Special Education Director of Special Education
